

Product Technologist Bakery Jack Link's In Ansbach

Jack Link's is not made up of a bunch of button-up, corporate types. Like our brands and products, we believe in being authentic and genuine. Life is too short to be artificial. We have never done things the way everyone else does. Over the years, for us these facts have always been more than just a way of doing business, it has been a way of life.

What makes working at Jack Link's so special? Jack Link's is a company for personal growth, for awesome characters who are real, love speed and with great self discipline. You can feed your wild side while working in a very international and fresh environment. We push hard and take risks - with the unwavering passion to get done what we have set out to do. All backed up by an unflinching eye on quality.

Jack Link's is a family owned and value driven company. In April 2014 Jack Link's bought the brands BiFi and Peperami from Unilever. The remainder of the year was used to separate the brands and organisation from Unilever as well as set up a new head office organisation in Amsterdam. In 2016 the Beef Jerky business was integrated and Jack Link's EMEA was up and running autonomously. In the meantime, Jack Links EMEA has grown to 50 employees and is still growing.

Based in Ansbach we have an open position for an enthusiastic

Product Technologist Bakery

who is interested in developing new products with meat and bakery products.

In this position you will report to the R&D Manager Ansbach

Purpose of the Job

As Product Technologist Bakery you provide technical knowledge for the development & implementation of product development initiatives to support and deliver Annual Operating Plan and Strategic business objectives.

Who are we looking for:

Thanks to your passion for product development, your technical Bakery skills and your "can do" mentality you will be an import initiator for the R&D department. You take the lead in the development projects and enthusiasm your colleagues within the Jack Links company. You like to work within a team, your social competence makes you a lovable colleague.

Key accountabilities

- Develop new product concepts based on the company vision
- Manage the bakery project (NPD, renovation, cost improvement, co-development, technology platform)
- Development of new products & product improvements from concept to successful launch
- Develop project timelines during projects
- Maintain complete, prioritized project list and communicate regular updates to leadership
- Act as a technical interface to marketing, co-packing and clients
- Ensure that products will match the ingredients and nutritional profile, legal requirements and product safety parameters
- Work with external suppliers
- Provide customer valued points of competitive differentiation that create growth
- Keep an eye on consumer trends, market trends and new technologies to drive growth
- Embracing the Jack Link's culture, incorporating its values into every day work life, acting as a culture ambassador and brand steward

Experience required

- A master's degree in Food Technology, Food Science, Biotechnology or Chemistry, with at least 5-8 years of relevant experience in product development or R&D (Food or FCMG).

Professional skills & key competencies

- You have advanced knowledge in food technology, processes, packaging, quality and product safety
- Excellent project management skills
- Ability to effectively build and maintain strong working relationships with both internal and external customers.
- Strong communication skills
- Appropriate network
- MS Office
- German - English is beneficially

What we offer you?

- A fulltime job in an international company
- Excellent working conditions and a more than competitive salary, including performance related variable reward? and pension scheme.
- We pride ourselves on having a high performing and collaborative culture where we offer support and development to enhance your career and develop your knowledge and skills.
